### ADD ANIMATION ( Same as Altitude Live Demo Site )

- Go to Downloaded Animation .txt > copy > Go To THEME OPTIONS > ADD this code to the Intergration Body Section > Save
- That's It! you should see the animation working now!

# C. DETAILED INSTALL

## STEP 1: Install Child Theme .Zip file

GO TO > Appearance > Themes > Add New (Add the .zip Altitude Child theme )  
And Activate as the Main Theme ( This is a Child Theme of the Parent Divi Theme)

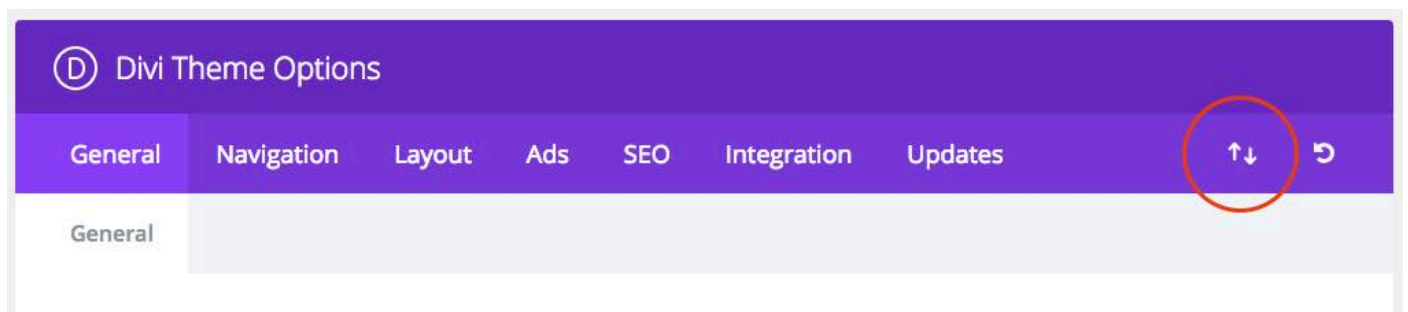

## STEP 2: Import XML

From your Wordpress Dashboard - GO TO Tools > Import > (Import the Wordpress Importer, Activate this plugin. You will now be asked to Choose a file - Add the XML Altitude.xml file here (Located in your Downloaded Import Folder)

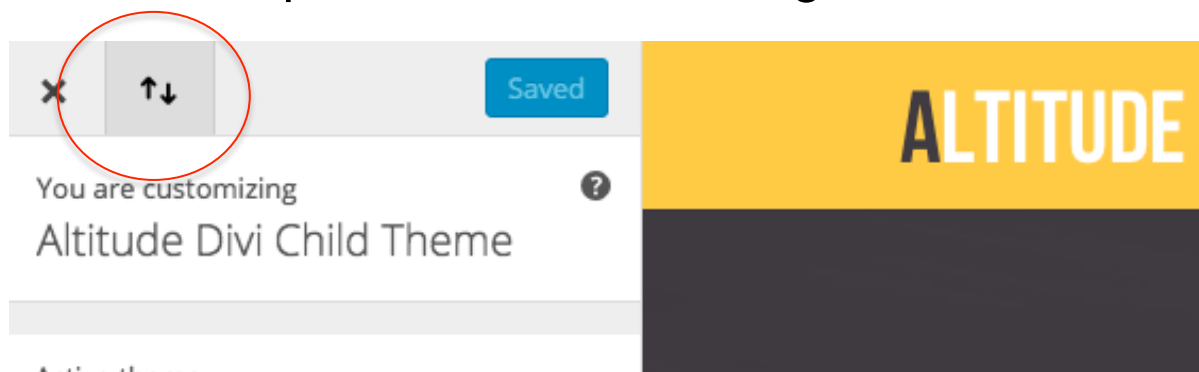

- Leave the top areas blank, check add content box and then save – this will then add all your content, menus etc. automatically.

## STEP 3: Import Theme Options .Json

GO TO > Divi > Theme Options ( Click on the up/down arrows at top ) and Import Altitude Theme Options Json file ( Located in your Downloaded IMPORT Folder) > SAVE.

## STEP 4: Import Customize Settings

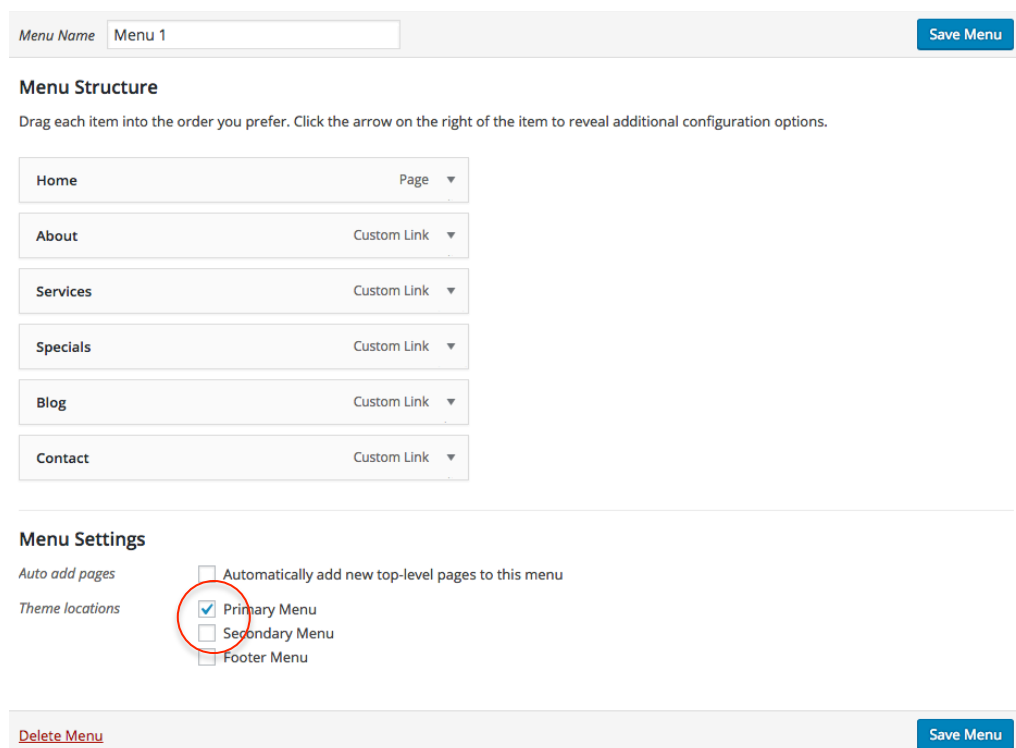

**GO TO** > Appearance > Customize > Import Customize .Json file ( Located in your downloaded IMPORT Folder). While here, **GO TO** > Static Front Page > Static Page > Choose Home Page

## STEP 5: Activate Menu

**GO TO** > Appearance > Menus > Check the correct menus

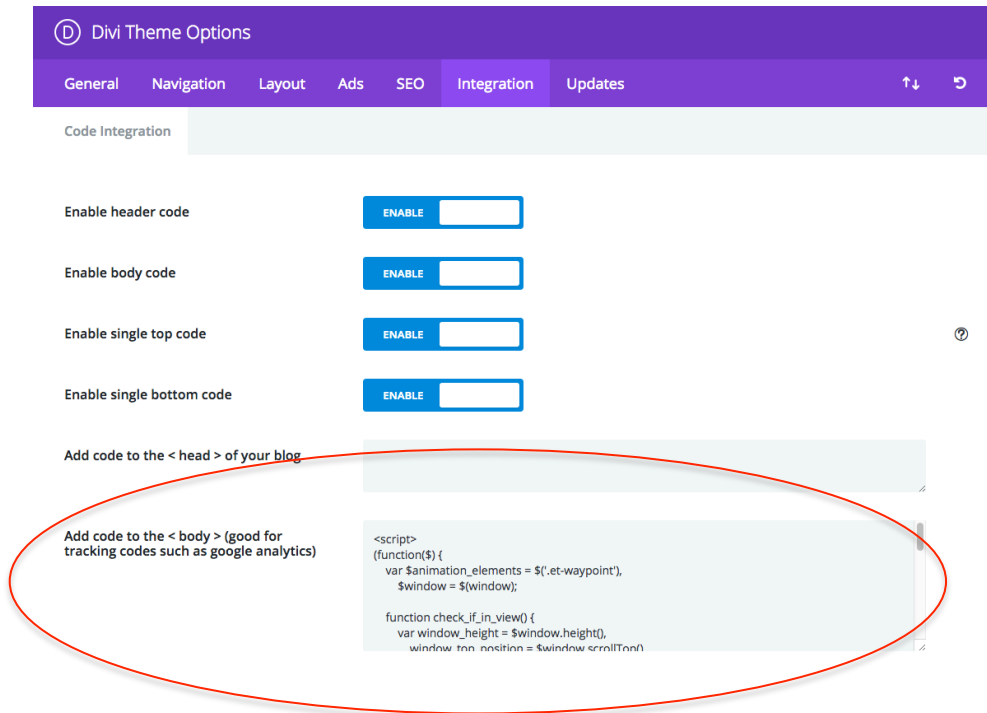

- Menu 1 (Primary Menu) > Check Primary Menu Box > Save

## STEP 6: Add Extras (see Extras Section)

### Add Animation: (Same as Live Demo)

1. Open Downloaded Extras Folder > Open Altitude Animation.tx file
2. Copy the code
3. Go to Divi > Theme Options > Integration
4. Add the copied code to the <body> section (see Diagram)

## .JSON FILES (Located in Import Folder)

You will also find .Json files of the **Home Page**. If you have decided to set up your own menu structure etc and just want to insert one of the pages, then this is how you can achieve this:

1. Open up a new page (Use Divi Builder)
2. Click on Up/Down Arrows
3. Import Home .Json Page (Located in Import Folder)
4. Update

That's It! Your new page has been added.
