

INSTRUCTIONS

AMPED

Free Divi 2.7+ Child Theme

Thank you for choosing Amped, one of Free One Page Divi Child Themes. This theme can be used as a quick website set-up or the platform to build a great website for your clients. Enjoy!

What's in your Free Child Theme?

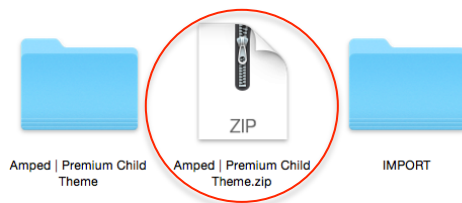

1. Divi Child Theme (Upload the Amped | Premium Child Theme Zip. File to your Themes – > Appearance > Themes)
2. JSON Files in the import Folder for the Home Page, Divi Theme Options and the Customizer Settings

INSTRUCTIONS

1. Download the Amped Theme from <http://lovedivi.com/> to your Desktop
2. A .Zip File will appear on your Desktop
3. Double click on the .Zip File to open the Free Child Theme | Amped Folder
4. Open the Folder which contains, A child theme file, a child theme .zip and an import File

Open up your NEW Wordpress dashboard where you would like to install the new Theme. Make sure you have uploaded and activated the latest Divi Theme to your site [Divi](#)

5. Go to Appearance > Themes and upload the .zip file called Amped | Premium Child Theme

6. Activate it as your Main Theme (You now have a Child Theme of your Main Divi Theme)

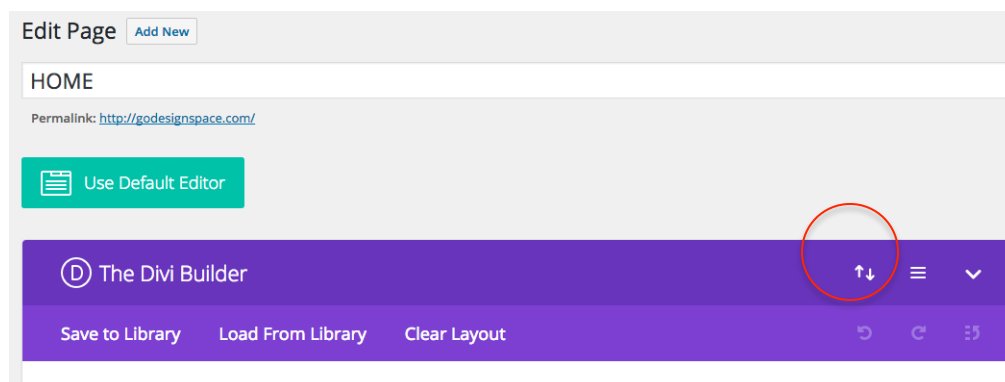

7. Create your Welcome page – Pages > Add New
8. Go to Appearance > Menus and create a new menu, add your Welcome page to the menu. Create a new menu and assign it as the primary navigation. You need to create "Custom Links" to each section. The pages anchor links needs to be updated with the URL of your site. The links/# can be found and edited in the homepage sections. Edit the custom URL : /#about, /#work, /#team, /#contact

In settings > reading set your Home page as a static homepage, Set Blog page to lists your posts.

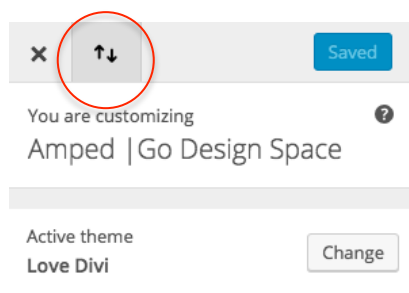

9. NOW its time to add the JSON files, Open the Import Folder from your Download. You will see 3 JSON files – Amped Home Page, Amped Theme Options and Amped Customizer.

10. IMPORT HOME PAGE JSON, go to your home page – Pages > All Pages – IMPORT, see image below.

11. IMPORT DIVI THEME OPTIONS JSON – Go to Divi > Theme Options and at the top of the page you will see the import/export button again. Click and import the Amped Theme Options Json file

12. IMPORT CUSTOMIZER SETTINGS – Go to Appearance > Customize and import the Amped Customizer File

13. SAVE, Now go to your website URL and see your new website. You can now edit photos etc to suite your new website.

To edit any of your CSS in the Child Theme Style Sheet, go to Appearance > Editor

That's all folks enjoy your new Theme, tons more to come.
