

# YELLOW.

Designed by [lovedivi.com](https://lovedivi.com)

## EASY INSTALLATION

Our themes are easy to install, follow the Instructions below and you will be running in just a few simple steps with **ONE CLICK DEMO IMPORT**.

## YELLOW DIVI CHILD THEME REQUIREMENTS

This theme requires you to purchase the Divi 3+ Theme from Elegant Themes. We recommend a clean install of Divi before using this theme. Follow the instructions below and you should have no problems – but if you do, we are here to help: [info@lovedivi.com](mailto:info@lovedivi.com)

## WHATS INCLUDED IN YOUR PACKAGE?

- ✓ Child Theme .zip – with all required installation documents
- ✓ All full JSON pages
- ✓ All JSON sections to add directly to your Divi Library
- ✓ Customizer JSON file
- ✓ Theme Options JSON file
- ✓ Content XML file for easy install
- ✓ License and Installation instructions

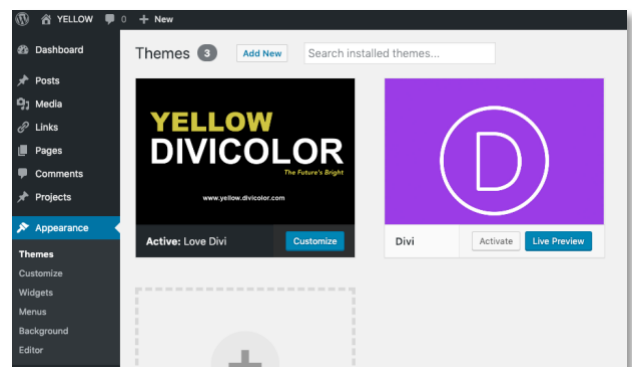

## INSTALLATION

Go to **Appearance > Themes >** and Add New Theme.

Having Divi 3+ installed is required before running this theme. A clean Divi install is recommended when using this theme.

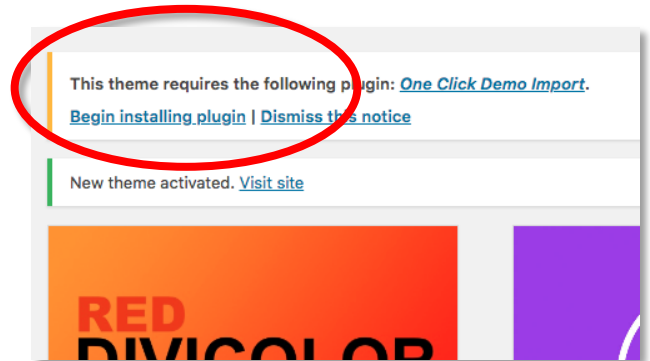

Click Upload **Theme > Choose File >** and choose our Child Theme .zip file to upload – called ‘Yellow Child theme.zip.’

Click **Activate >** and you will see your new Divi child theme activated and the original Divi Theme to the right of it.

## INSTALL ONE CLICK DEMO IMPORT PLUGIN

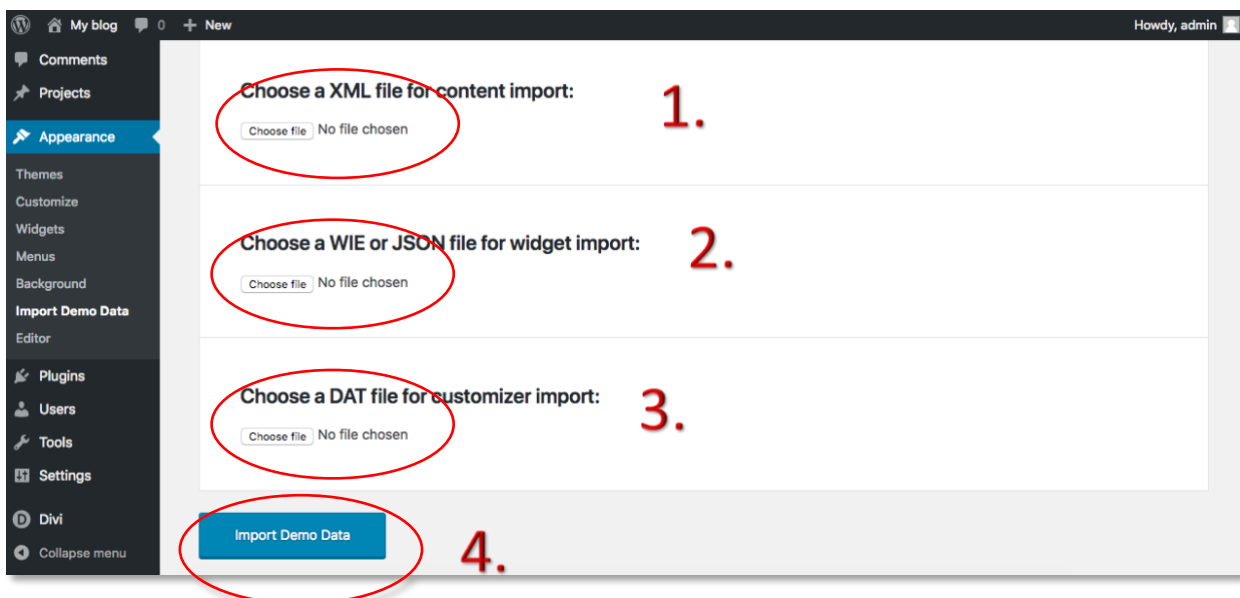

After activating the child theme, you will automatically be instructed to install the One Click Demo Import Plugin. This plugin will help you get up and running in just a few Easy clicks.

Open up the **ONE CLICK DEMO IMPORT PLUGIN**. You will be asked to import 3 files using the plugin:

1. XML File that contains your new sites content ( Called content.xml)
2. WIE Widget File which contains all widgets etc from the Child Theme (Widget.wie)
3. Customizer .DAT File which contains all your new Customizer settings (customize.dat)

For each section Click Choose File > and locate content.xml file in download and import that file. Then next you will upload the widget.wie file, and finally the customize.dat File. Once you have added all 3 files then click the blue button at the bottom called: **IMPORT DEMO DATA** (See Diagram Below)

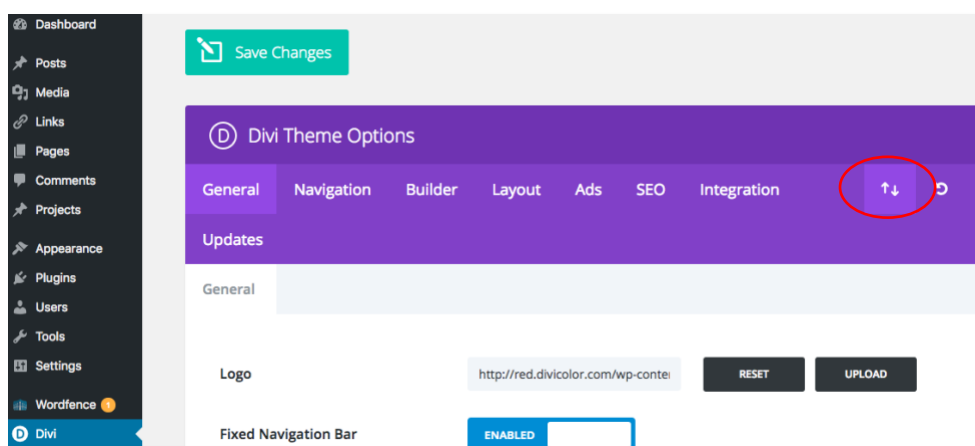

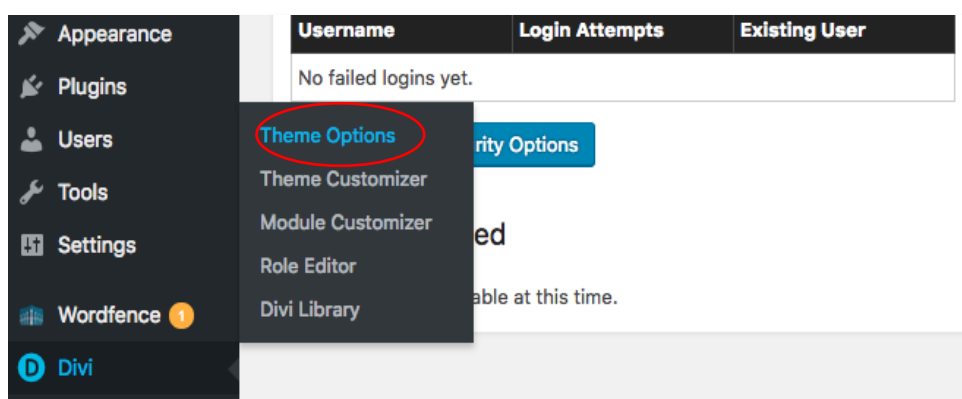

**Well done! You are almost done. Now you need to add the following:**

1. Upload Divi Theme Options JSON File to your Theme
2. Add Font Awesome Social Media Icons to your Main Menu as in the Demo

## 1. UPLOAD DIVI THEME OPTION

Go to DIVI > THEME OPTIONS > (see image below)

Click on the Import / Export Button (Up Down Arrows). Import and choose your new downloaded JSON Theme options file called ' Yellow Divi Theme Options.json'

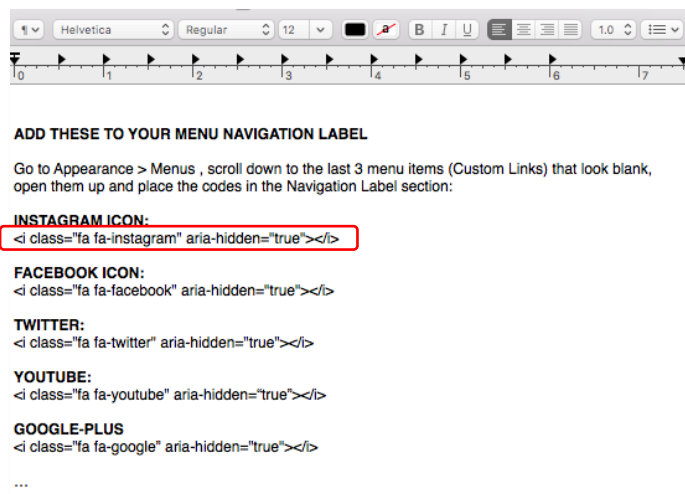

- This will automatically add the YELLOW. logo from the demo (which you can change later) and also add the Font Awesome code in the DIVI > THEME OPTIONS > INTERGRATION ... <head> section.

*You can now go and add your Font Awesome icons in the Menu,*

## ADD FONT AWESOME SOCIAL MEDIA ICONS

In your download, you will notice a License text file called License and Font Awesome Instructions. Open this file using any text editor.

You will see in the text editor a few Social Media Icon codes that need to be placed into your menu Navigation label. How do I do that? (See below...)

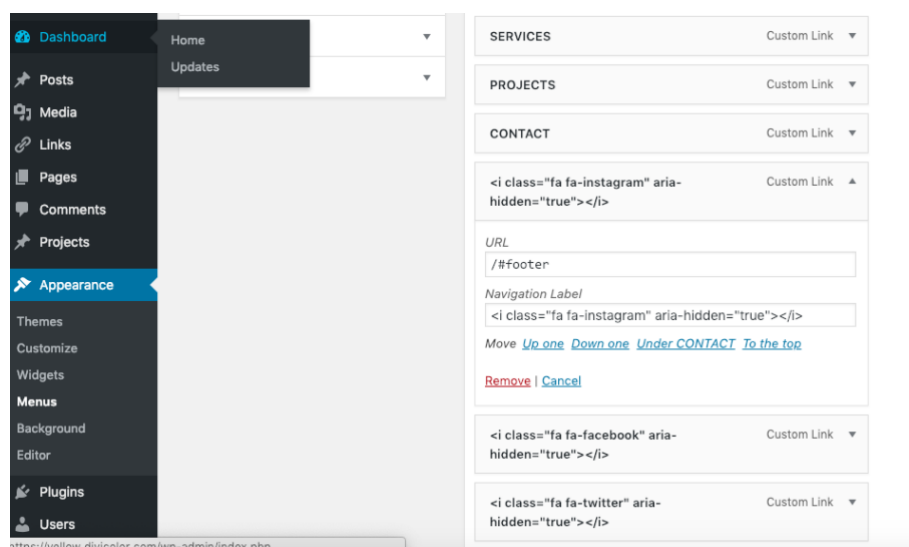

With your text editor open, copy the Instagram code `<i.....></i>`

Place the code in the Navigation Label Box, and click save menu.

*You can do the same for the other Navigation boxes and add the social Media icon of your choice.*

Go to: <https://fontawesome.com/icons/> for more icon codes.

Create a Custom Link  
And add each font  
Awesome code in the  
Navigation Label  
Section.

**Well DONE!** That's It – your new theme should look just like the YELLOW. Demo theme. Now you can be creative and start adding your own content and images.

#### OTHER USEFUL NOTES:

- Not too sure with CSS Coding? Not a problem - In your Child Theme CSS section, you will notice the CSS Code is clearly labelled so you can see where to change colours and many of the other CSS Edits.
- You can add the Font Awesome Code yourself in the Divi > Theme Options > Intergration section.

Enable single top code	<input type="checkbox"/> ENABLED
Enable single bottom code	<input type="checkbox"/> ENABLED
Add code to the < head > of your blog	<pre>1&lt;link rel="stylesheet" href="https://maxcdn.bootstrapcdn.com/font- awesome/4.6.3/css/font-awesome.min.css" /&gt;</pre>

Copy the code from your downloaded text file and paste it in the box (as above), click SAVE.

- THANK YOU FOR USING LOVEDIVI THEMES -
